INVOLVED IN THE CREATION OF THE NATIONAL COMPOSITE CENTRE – LUXEMBOURG

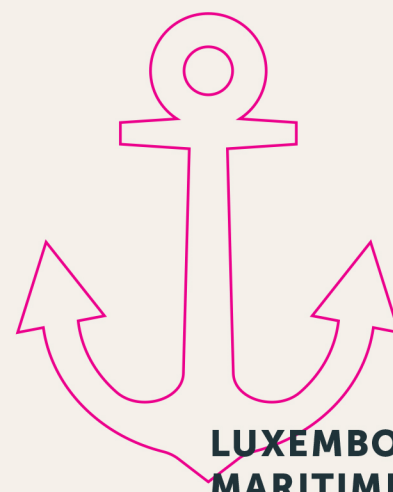

A cluster brings together, on a clearly identified territory and targeted theme, companies of all sizes, research centers and training institutions. The national and local public authorities are strongly associated with this dynamic. The challenge is to rely on synergies and trust between the players in order to encourage practical cooperation in collaborative and innovative projects. Clusters are thus intended to support competitiveness, growth and employment.

Inspired by Michael Porter, professor at Harvard Business School, 1990.
