

Achievements

75% of the companies led by former mentees are still in business.

75% of the mentees have significantly improved their self-management practices and leadership skills throughout the mentorship.

85% have achieved the goals they initially set along with their mentor.

Did you know that...

Self-management refers to specific competencies related to entrepreneurial behavior. It can be described as the personal application of behavioral change tactics that produces a desired change in behavior, according to the characteristics of the environment, challenges and partners involved.
