EXPORT POWER

A trio of Luxembourg small and medium sized enterprises have been honoured for their exporting prowess. The Chamber of Commerce and ODL, the Grand Duchy's export credit insurance agency, put the spotlight on the three small and mid-sized firms during the 2013-2014 "Export Awards", presented last month. MCM Steel, which sells specialised metal products, received the €15,000 first prize. The €10,000 second place prize was awarded to Biorock, which sells ecologically friendly sewage treatment systems, while the €5,000 third place prize was bestowed upon social media analysis firm Trendiction. Launched in 2011, the Export Award recognises SMEs that are making a mark with their international activities. The prize is open to any type of business with less than 250 employees. **AG**
